EXPERIENCE

Software Engineer Intern

Softraw IT Solutions Pvt. Ltd.

July 2024 - August 2024

Jaipur

- Designed and implemented responsive **UI components** using HTML, CSS, Bootstrap, and JavaScript.
- Built Restful APIs and backend logic using Java (Spring Boot) to support core features.
- Developed Python scripts to automate **data processing** and routine tasks.
- Wrote unit tests in **Java and Python** to ensure code quality and minimize bugs.
- Optimized **SQL queries** and backend services to improve system performance.
- Collaborated closely with developers to debug, review, and enhance code.

SKILLS

Languages: Python, JavaScript, HTML/CSS

Frameworks: Bootstrap, Node.js

Tools & Platforms: GitHub, Docker, MySQL, Linux, AWS

Soft Skills: Communication, Time-management, Adaptability, Team-work

PROJECTS

Car Rental Web | *HTML, CSS, Bootstrap, Generative AI*

- Developed a **responsive car rental website** using **HTML, CSS, Bootstrap**, and integrated **Generative AI features** to enhance user experience.
- Integrated **Generative AI** to allow users to input prompts for **dynamic content generation**.
- Enabled the website to **generate customized HTML/CSS code snippets in real-time** based on user inputs, improving website personalization.
- Showcased available cars with images, descriptions, and rental prices, including **filtering options** based on car type (e.g., SUV, Sedan) and price range.

E-commerce Web App | *HTML, CSS, JavaScript, Bootstrap*

- Built a fully responsive **E-commerce website interface** using **HTML, CSS**, and **Bootstrap**, mimicking real-world online store functionality.
- Added **CSS hover effects, transitions, and interactive buttons** to improve user engagement.
- Ensured **mobile responsiveness** and smooth rendering across devices with consistent styling and layout.
- Optimized images and assets** to reduce loading time and improve site performance without compromising quality.

Sentiment Analysis | *Python, NLP, Pandas*

- Developed a **sentiment analysis tool** to classify text data as **positive, negative, or neutral**.
- Preprocessed and cleaned large datasets, including **tokenization, stop word removal, and stemming** to prepare text for accurate sentiment classification.
- Integrated **data visualization tools** to present **model performance metrics** and **sentiment distribution** in a user-friendly interface.

CERTIFICATES

- * Certification of **Generative AI** from YHills.
- * Certification of Introduction to MongoDB from MongoDB.
- * Certification of **Data science** Workshop from Learn and Build.
- * Certification of Javascript from **Devtown**.
- * Certification of New Trends In IOT.
- * RHCSA Certification from Redhat.
